

CLINTON NYAMORA JUMA

✉ clintonjuma4400@gmail.com ☎ +254794063568 📍 Nairobi, Kenya

PROFESSIONAL SUMMARY.

Detail-oriented and results-driven ICT professional with a Bachelor's degree in Information Science (Informatics option), certifications in Full Stack Development, Data Science and Information Systems solutions (CISSE), coupled with hands-on experience in End user support, systems monitoring, and data analysis & management. Skilled in technical troubleshooting hardware, software, and network issues, implementing system change requests, and ensuring data security standards. Recognized for strong problem-solving, organizational skills, communication and teamwork. Seeking to leverage my technical expertise, analytical skills, and commitment to operational excellence.

SKILLS

Technical

- **ICT Support & Help Desk:** Proficient in providing first-line technical support to end users by diagnosing and resolving hardware, software, and network-related issues. Skilled in using help desk systems answering questions, providing guidance and helping users utilize solutions provided.
- **Hardware & Software Troubleshooting:** Experienced in installation, preventive maintenance, and repair of desktops, laptops, VoIP, printers, and peripherals. Adept at configuring and updating operating systems (Windows/Linux) and software applications to optimize performance and ensure compatibility.
- **Computer Applications & Office Tools:** Proficient in Microsoft 365 (Word, Excel, Outlook, Teams, PowerPoint) and Google Workspace, with advanced skills in Excel for data analysis, reporting, and documentation tasks.

- **Data Analysis:** Proficient in using Python (Pandas, Matplotlib, numpy, Seaborn), SQL, and Excel for data cleaning, visualization, and reporting to support business and ICT decision-making.
- **Machine Learning:** Adept at performing predictive modeling, applying supervised and unsupervised learning techniques in Python for model building, deployment for data-driven insights.
- **Network Troubleshooting:** Competent in configuring routers, access points, and LAN/WAN networks, resolving connectivity issues, and ensuring stable, secure, and reliable access.
- **Data and Database Management:** Working knowledge of SQL for querying and maintaining relational databases, alongside experience in data entry, backup, extraction, and restoration to ensure data integrity and availability.
- **User Training & Support:** Adept at providing user training, guidance, onboarding, and basic ICT training to improve staff and student competence in system usage and security best practices.
- **Full Stack Development-** Ability to build and maintain applications using HTML, CSS, React, Django, Flask, and MySQL, supporting system integration and process automation.
- **Information Security & ISO Standards:** Knowledgeable in applying ISO 9001/2015 and ISO 27001/2013 data security requirements, including antivirus configuration, firewall setups, VPN implementation, access controls, and compliance reporting.

Soft

- **Effective Communication:** Strong verbal and written communication skills; able to explain technical concepts clearly to non-technical users and prepare accurate data reports and documentation.
- **Organizational & Planning Skills:** Skilled in maintaining technical logs and coordinating tasks to ensure timely issue resolution and resource allocation.
- **Teamwork & Collaboration:** Proven ability to work effectively with colleagues, trainers, and cross-functional teams to achieve shared goals and support university ICT operations.
- **Initiative & Reliability:** Self-driven in identifying technical needs, initiating solutions, and supporting supervisors with actionable reports while remaining dependable and resilient under pressure.
- **Research & Innovative:** Skilled in researching emerging technologies, evaluating ICT tools, and recommending practical, value-adding solutions to improve operations and service delivery.
- **Analytical & Problem-Solving Skills:** Logical thinker with strong diagnostic ability to assess, troubleshoot, and resolve hardware, software, and network issues efficiently.
- **Attention to Detail:** Meticulous in system configuration, data management, and ICT inventory control to ensure accuracy and minimize errors.
- **Adaptability & Continuous Learning:** Quick to adapt to new technologies, eager to acquire new ICT skills, and committed to professional growth in a dynamic environment.
- **Time Management:** Effective in prioritizing tasks and meeting deadlines while managing multiple responsibilities.
- **Ethical Integrity:** Dedicated to confidentiality, honesty, and integrity in handling ICT systems, university data, and user interactions.

RELEVANT COURSEWORK AND PROJECTS.

- **Computer Networks:** Gained hands-on skills in network design, configuration, and troubleshooting using tools such as Cisco Packet Tracer. Strengthened my ability to resolve connectivity issues, configure routers and switches, and support reliable access to networked services.
- **Information Security:** Acquired practical knowledge in implementing security measures such as firewalls, antivirus software, and access controls. Enabled me to assist in safeguarding systems and ensure secure deployment and user access, aligning with help desk and endpoint support roles.
- **Database Management Systems:** Developed and managed relational databases to ensure data accuracy, security, and backup strategies. Developed different databases for personal and academic assignments using MySQL and SQL.
- **Full Stack Development:** Designed and developed several applications, including a consultancy services website and various ecommerce websites utilizing html, css, bootstrap, Django and mySQL. These projects enhanced my skills in client-server communication, responsive design, and deployment — directly relevant when supporting university systems and online platforms.
- **Data Science with Python:** Gained practical skills in data analysis, machine learning, automation, and visualization using Python libraries such as pandas, matplotlib and sklearn exploring various models. Completed many projects involving the analysis of large datasets, extracting insights, generating clear visual reports and predictive modeling, sharpening my ability to manage and interpret university data accurately
- **Project Management:** Learned to plan, coordinate, monitor, and document technical activities. Used these skills to successfully manage my final year project, and they directly support my ability to initiate, follow up, and report on delegated ICT support tasks
- **Software Development:** Understood software development life cycles (e.g., Waterfall model), and applied basic development principles to build and test simple applications. Helped me understand system behavior and better support software deployments and updates
- **Human-Computer Interaction:** Studied user-centered design principles and accessibility, which improved my ability to provide empathetic and user-friendly support, especially when documenting user guides or training end users.

EXPERIENCE

IT OFFICER ATTACHEE' - End User support and Maintenance Section
University of Nairobi – Nairobi, Kenya

August 2023 - November 2023

- Delivered first-line technical support to over 200 staff and students, investigating and resolving hardware, software, and network issues promptly, reducing downtime by 90%.
- Actively engaged in responding to Help Desk and Service Desk requests, answering questions, providing guidance and helping users utilize solutions, ensuring operational efficiency by 90%.
- Performed installation, configuration, and preventive maintenance of desktops, laptops, printers, scanners, VoIP systems, and related peripherals. Efficiently reducing setup times by 20%, directly improving the deployment process.
- Conducted LAN/WAN troubleshooting, router configurations, and connectivity support optimizing connectivity and improving network uptime by 30%.
- Supported the implementation and enforcement of IT security protocols, including firewall setups, antivirus configurations, and access controls. Contributed to a 30% improvement in the university's cybersecurity posture by assisting in regular audits and monitoring.
- Contributed to capacity-building initiatives by training staff and students on ICT systems, applications, and security awareness, enhancing digital literacy and user competence
- Performed data management functions including data entry, backup, extraction, and restoration, ensuring 100% data integrity and secure access to institutional information.
- Assisted in preparing technical reports, including weekly, monthly, quarterly, and annual updates on system health, IT service performance, and issue resolution, ensuring the timely and accurate completion of documentation in line with university policies.
- Assisted in deploying and updating operating systems, business applications, and software packages on end-user devices, ensuring smooth adoption and adherence to ICT policies.
- Assisted in deploying operating systems and software on computers, tablets, and laptops under the guidance of senior staff. This experience enhanced my familiarity with system deployment, updating user manuals, and ensuring smooth end-user operations.

IT SUPPORT AND ADMINISTRATIVE ASSISTANT

November 2024–To date

Dahafsa Merchants - Nairobi, Kenya

- Responsible for providing first-line IT support by diagnosing and resolving hardware and software issues on office desktops, printers and laptops, reducing downtime by 80%.
- Conducting installation, configuration, and maintenance of Windows operating systems and common office applications to ensure smooth day-to-day operations.
- Assisting in monitoring and maintaining office internet and network systems, resolving basic connectivity issues by 100% and ensuring stable access for all users.
- Responsible for Organizing and digitizing company documents, supporting data management and improving retrieval time for operational records by 100%.
- Responsible for Drafting and managing company correspondence, including receiving, drafting, and responding to letters, ensuring timely communication and proper documentation. Improving operational efficiency by 70%.
- Organizing and maintaining company files, records, and office documents for easy retrieval and compliance.
- Perform office administrative duties including front-desk support, correspondence handling, and task coordination, ensuring professional representation of the company.
- Responsible for delivering office documents to required locations and picking up, increasing operational efficiency by 70%.
- Support office cleanliness and organization, creating a professional and productive work environment by 100%.

EDUCATION

Technical University of Kenya – Nairobi, Kenya

July 2019 – December 2023

- Bachelors of Science, Information Science (Informatics)

CERTIFICATIONS

-
- Certified Information Systems Solutions Expert (Foundation Level) - KASNEB
 - Data Science with Python – Sankhyana Institute
 - Full Stack Development –Sankhyana Institute
 - Data Analytics Essentials – Cisco Networking Academy
 - Computer Hardware Basics- Cisco Networking Academy
 - Network Support and Security– Cisco Networking Academy
 - Introduction to Cyber Security– HPLIFE
 - Data Science and Analytics -HPLIFE

LANGUAGES

-
- English - Fluent
 - French-Intermediate
 - Kiswahili-Fluent
